

ECSE 223
Model-Based Programming

Winter 2019
Iteration 4
Project Report

Group P 6

Zheng Yu Cui (260808525)
Xu Hai (260661832)
Murray Kornelsen (260714814)
Helene Ma Yang (260775804)
Haowei Qiu (260762269)
Weijing Zhang (260784623)

March 15, 2019
McGill University

Features

1. **Start/pause/resume game** (Murray Kornelsen)

- Controller Interface (all members)

Modifier methods

```
public static void startGame(String gameName) throws InvalidInputException;  
public static void openSavedGame(int gameId) throws InvalidInputException;  
public static void pauseGame();  
public static void resumeGame() throws InvalidInputException;  
private static void startGameLoop();
```

*Query methods *see sequence diagram(s) at the end of the document**

```
public static List<TOGame> getPlayableGames();  
public static List<TOParticularGame> getSavedGames();  
public static TOParticularGame getCurrentPlayingGame();  
public static TOParticularLevel getCurrentPlayingLevel();  
public static List<TOGridCell> getBlocksOfCurrentLevel();
```

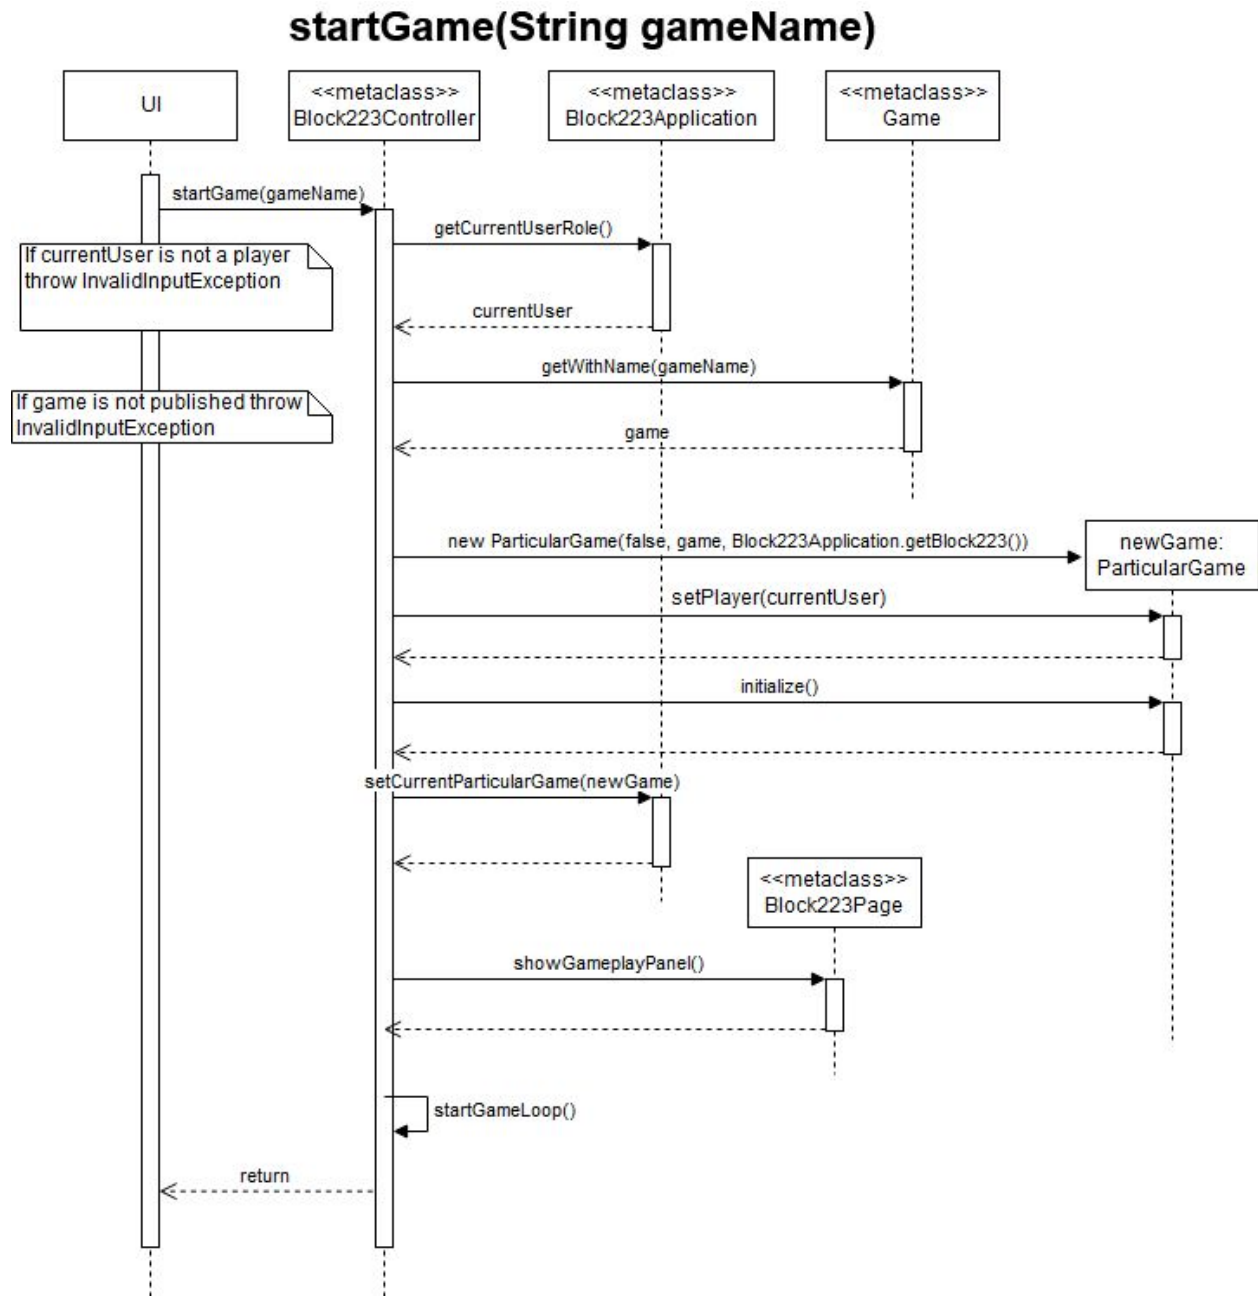

- View Interface

```
public static void showGameplayPanel();  
public static int getUserInput();  
public static void redrawGamePanel();
```

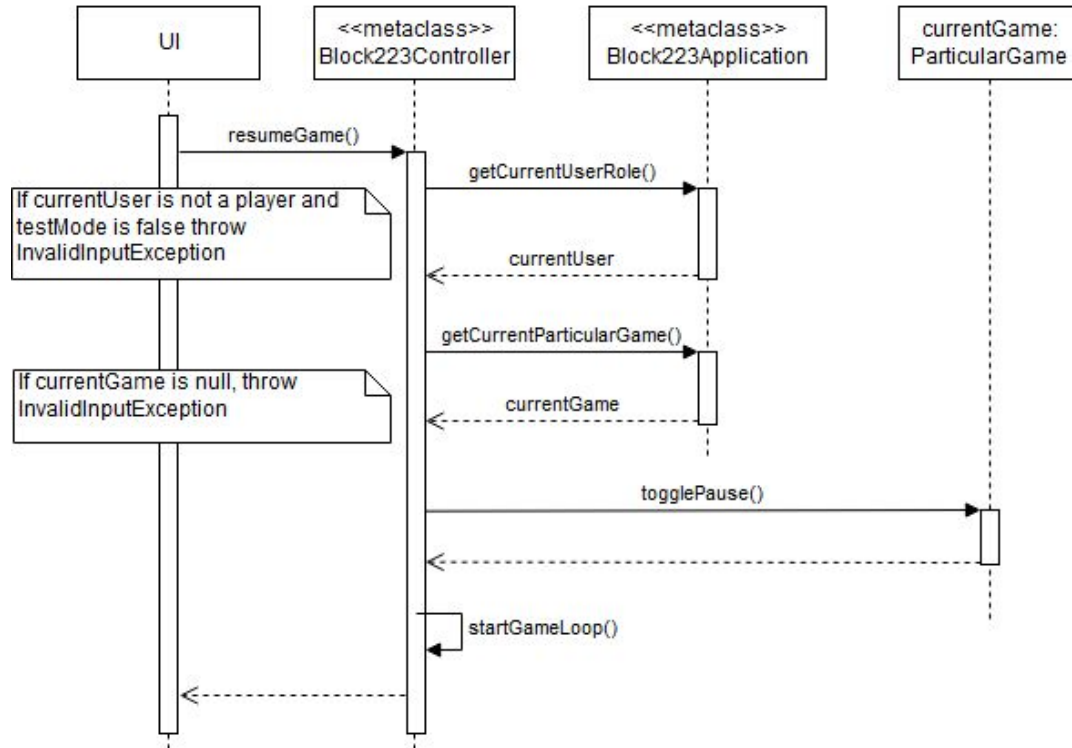

- Sequence Diagrams

Controller:

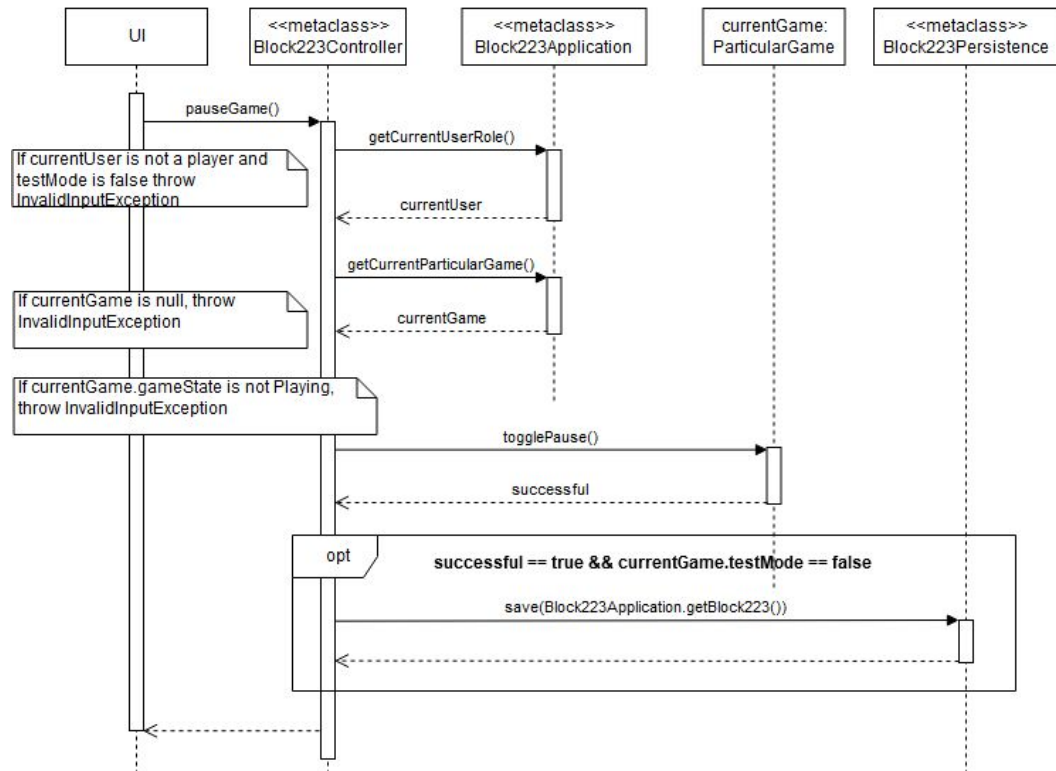

Modifier methods

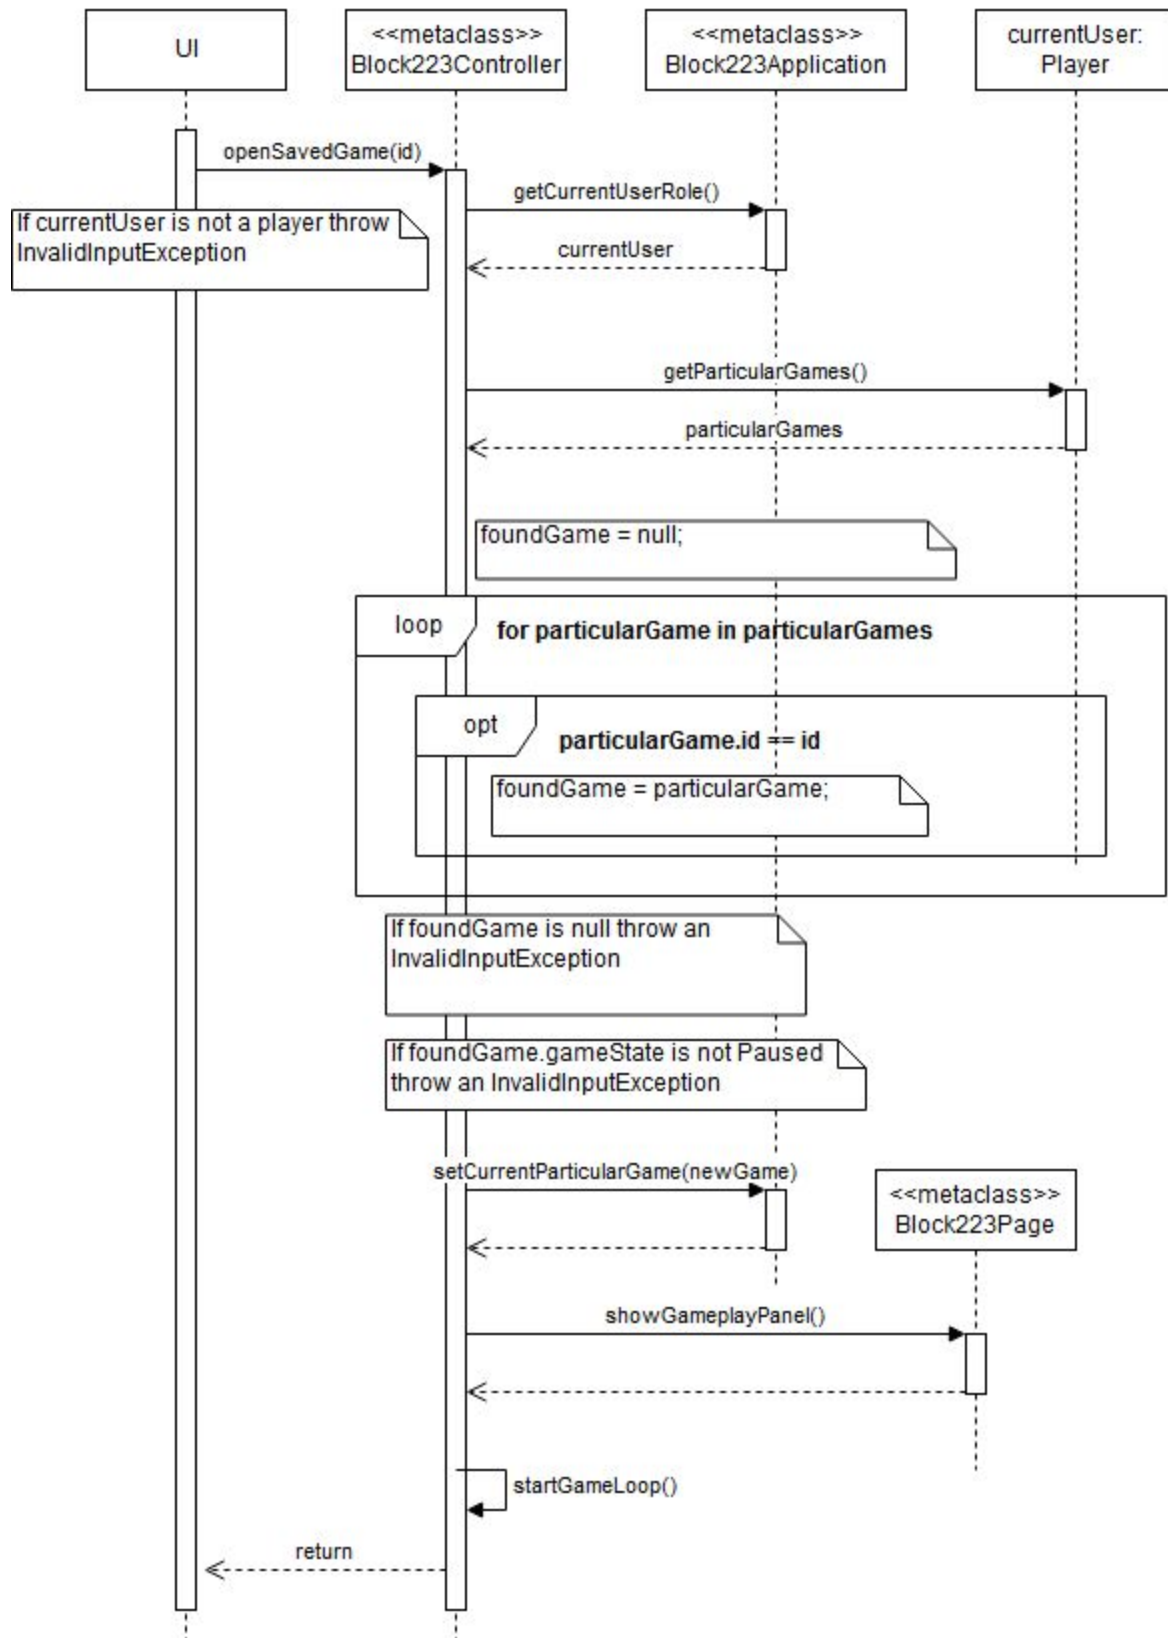

resumeGame()

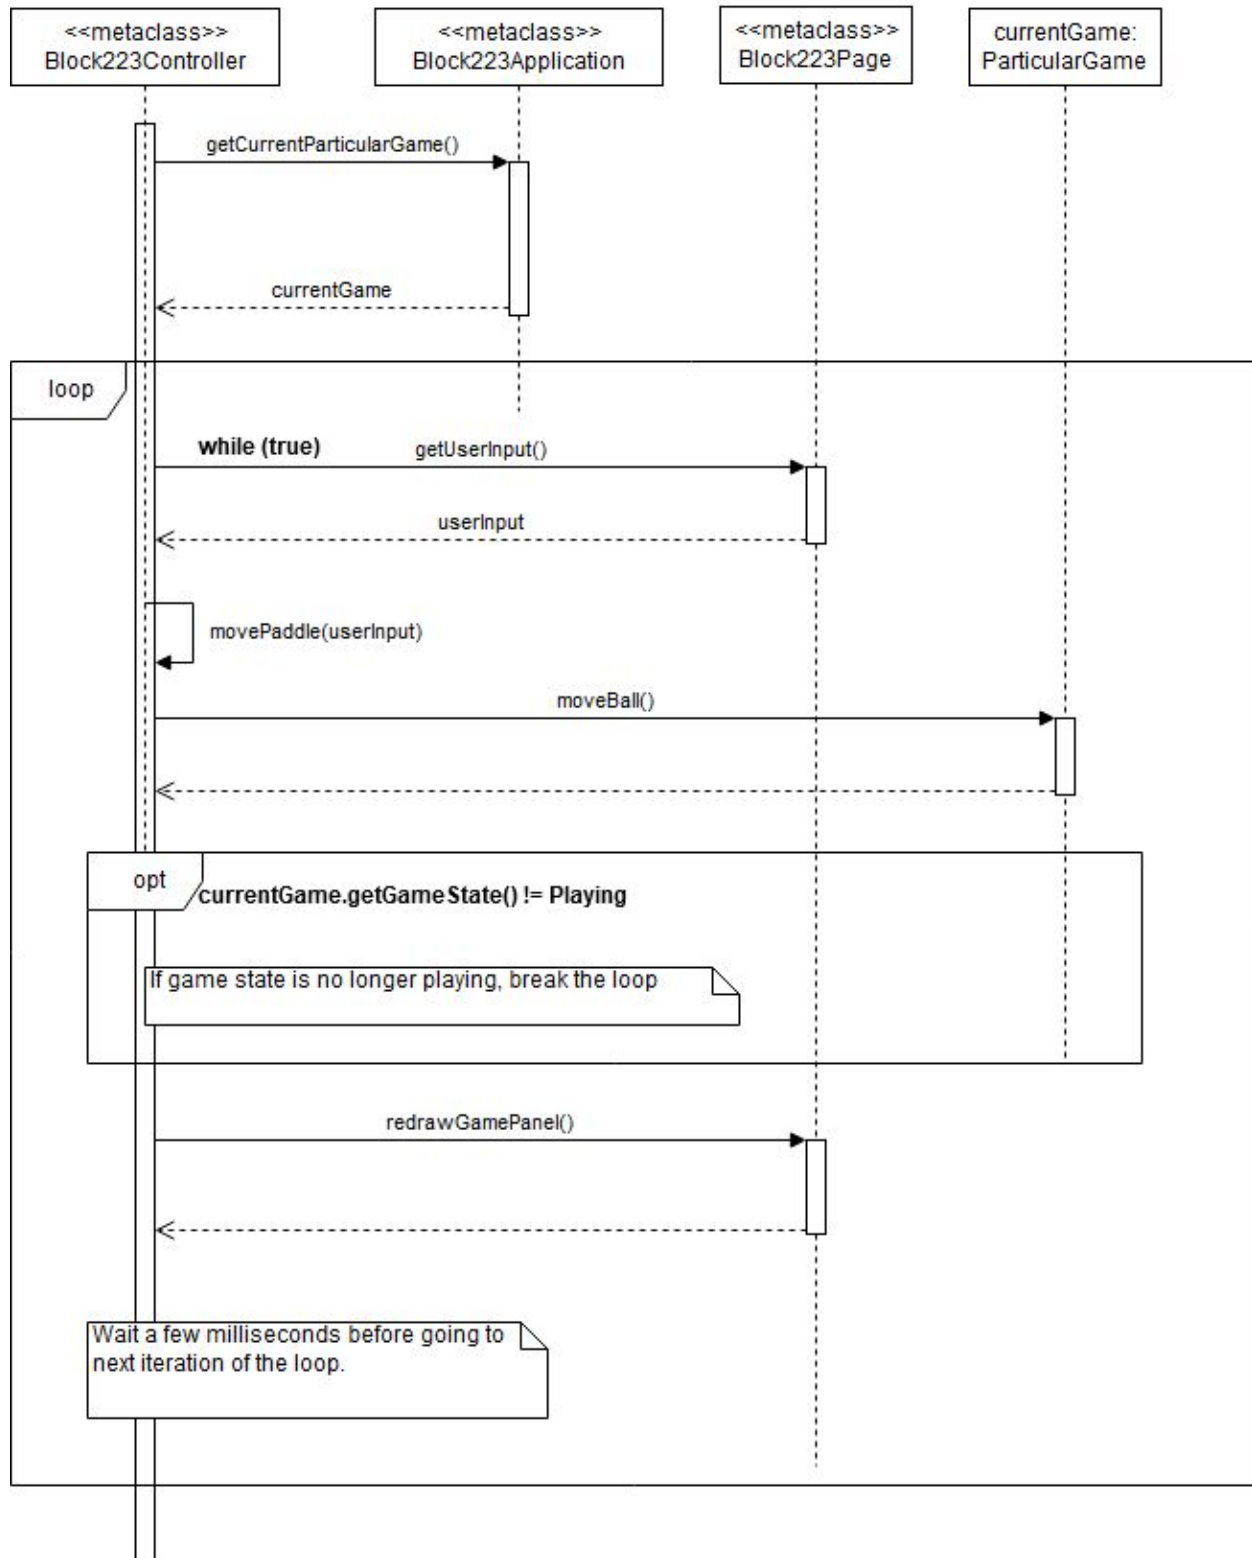

pauseGame()

openSavedGame(int id)

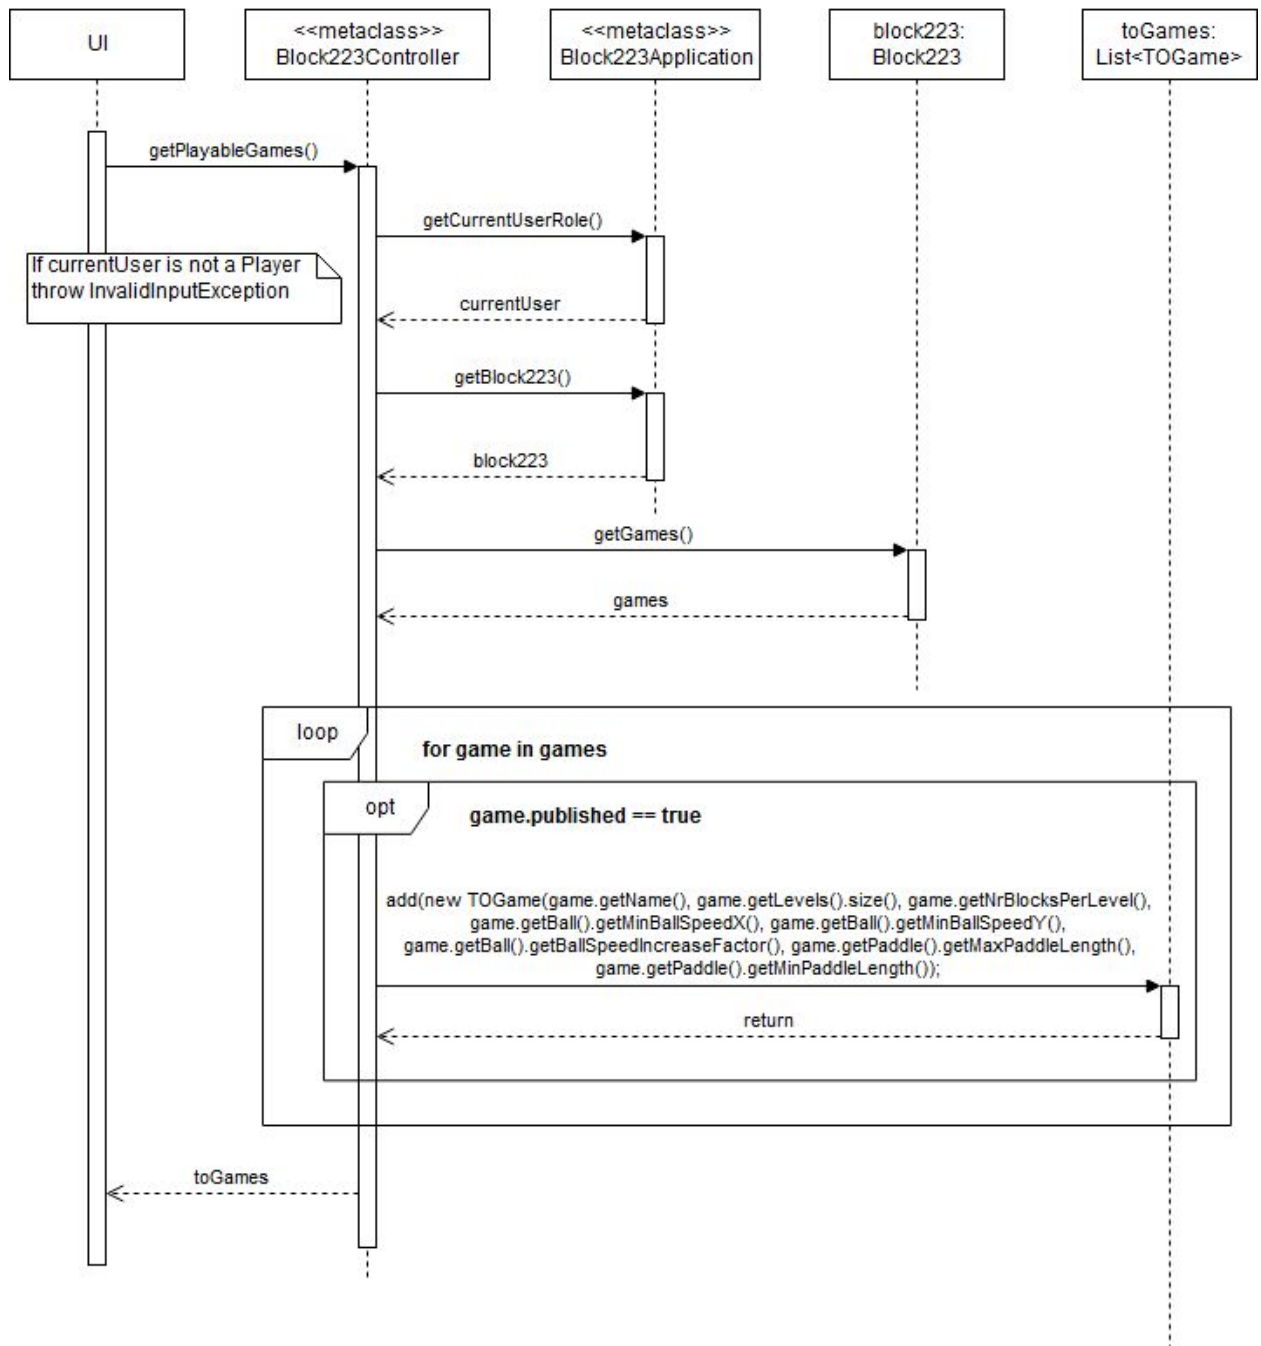

startGameLoop()

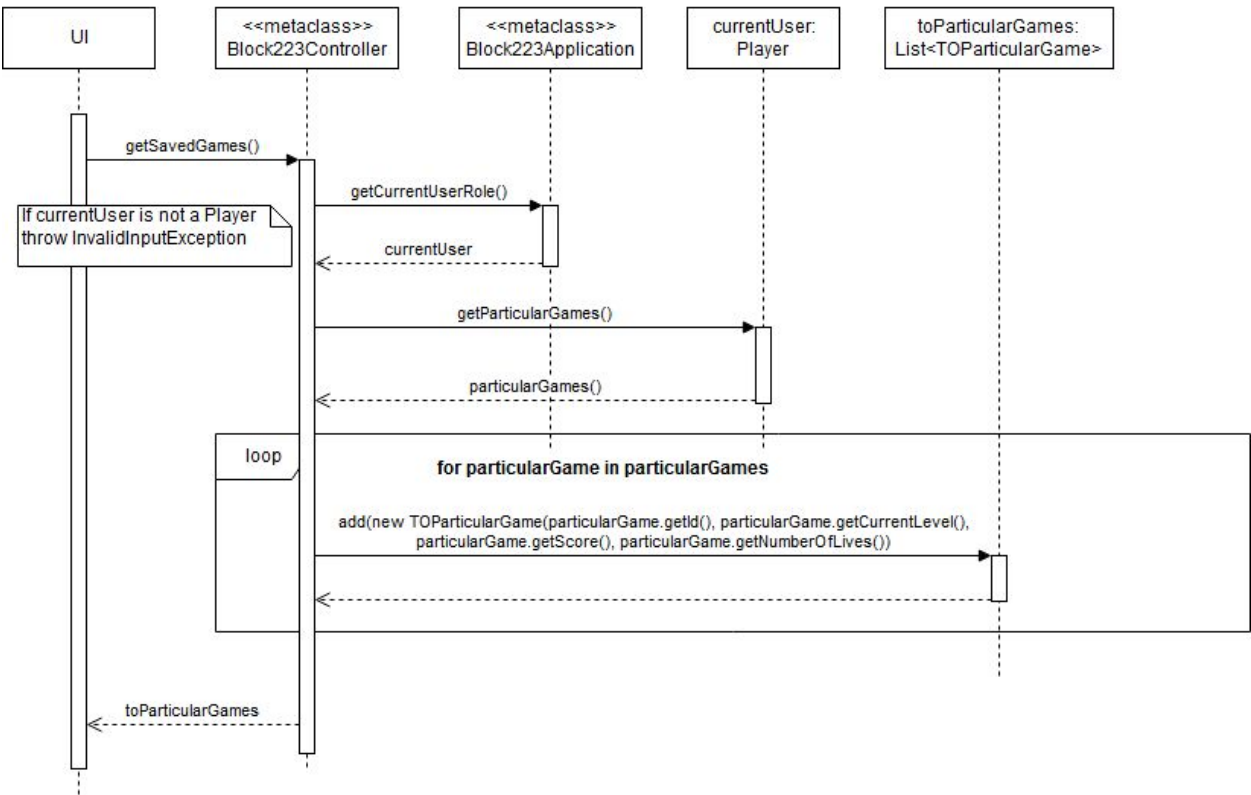

Query methods

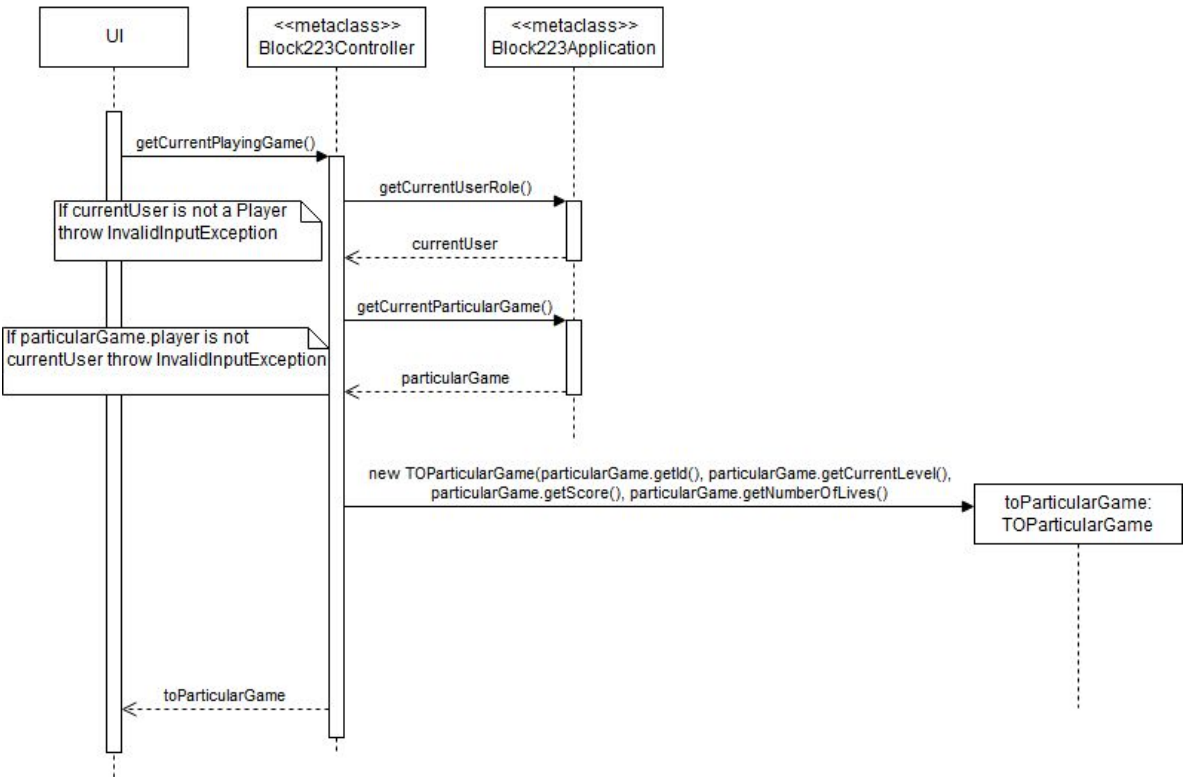

getPlayableGames()

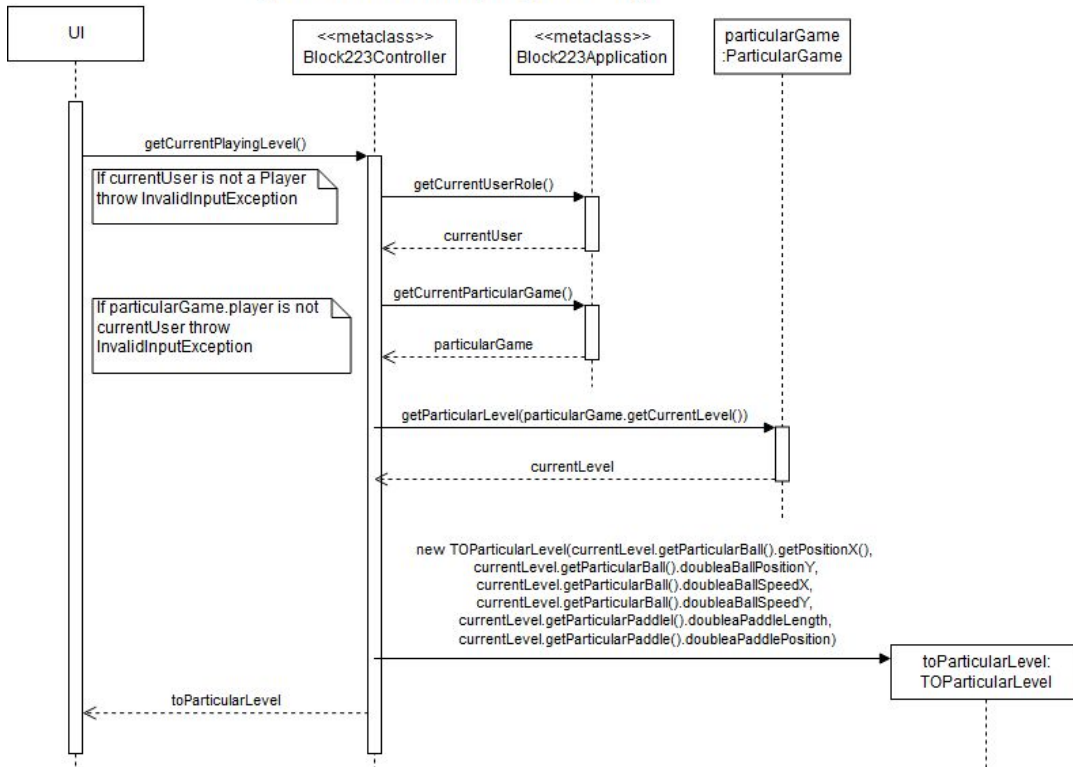

getSavedGames()

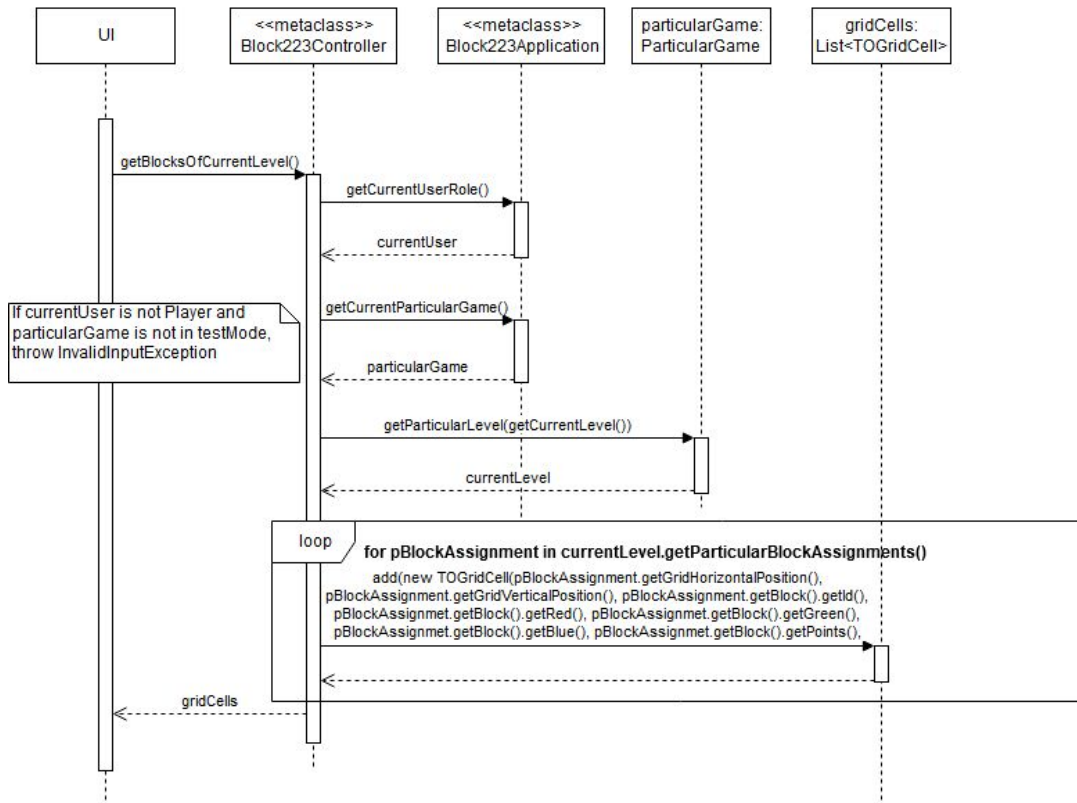

getCurrentPlayingGame()

getCurrentPlayingLevel()

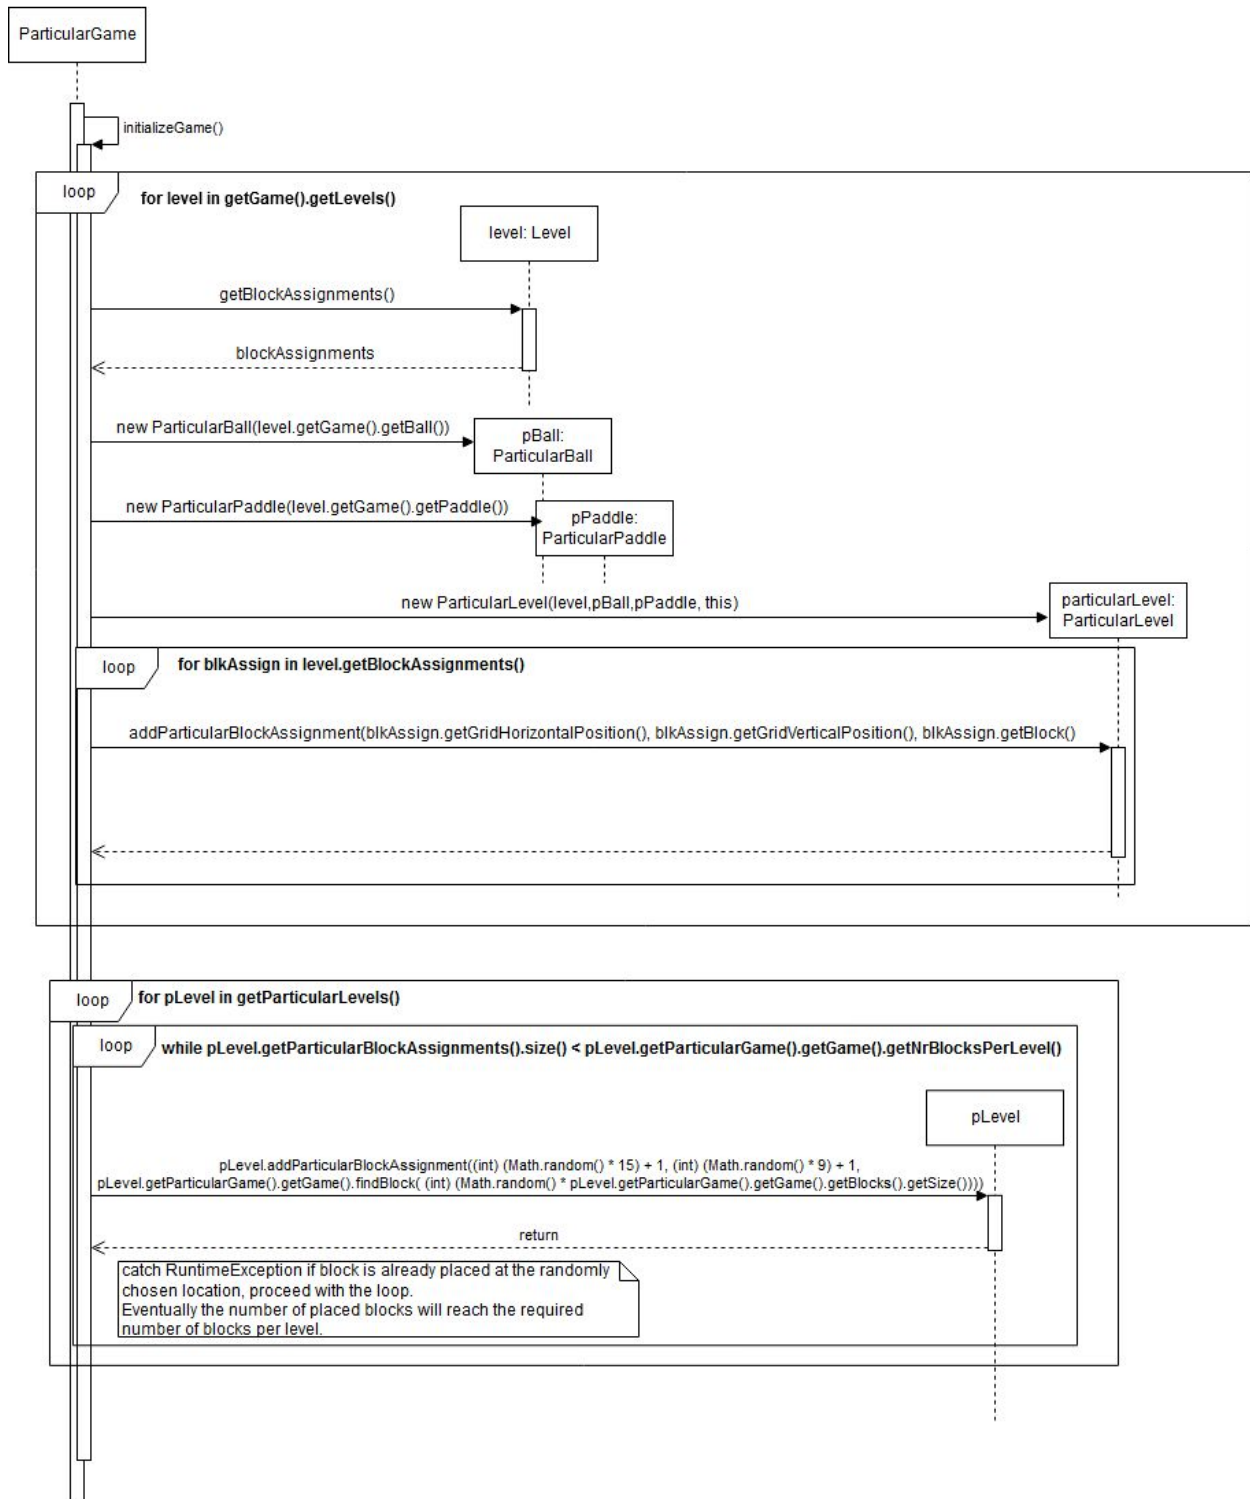

getBlocksOfCurrentLevel()

Private method for guard/action (State Machine)

initializeGame()

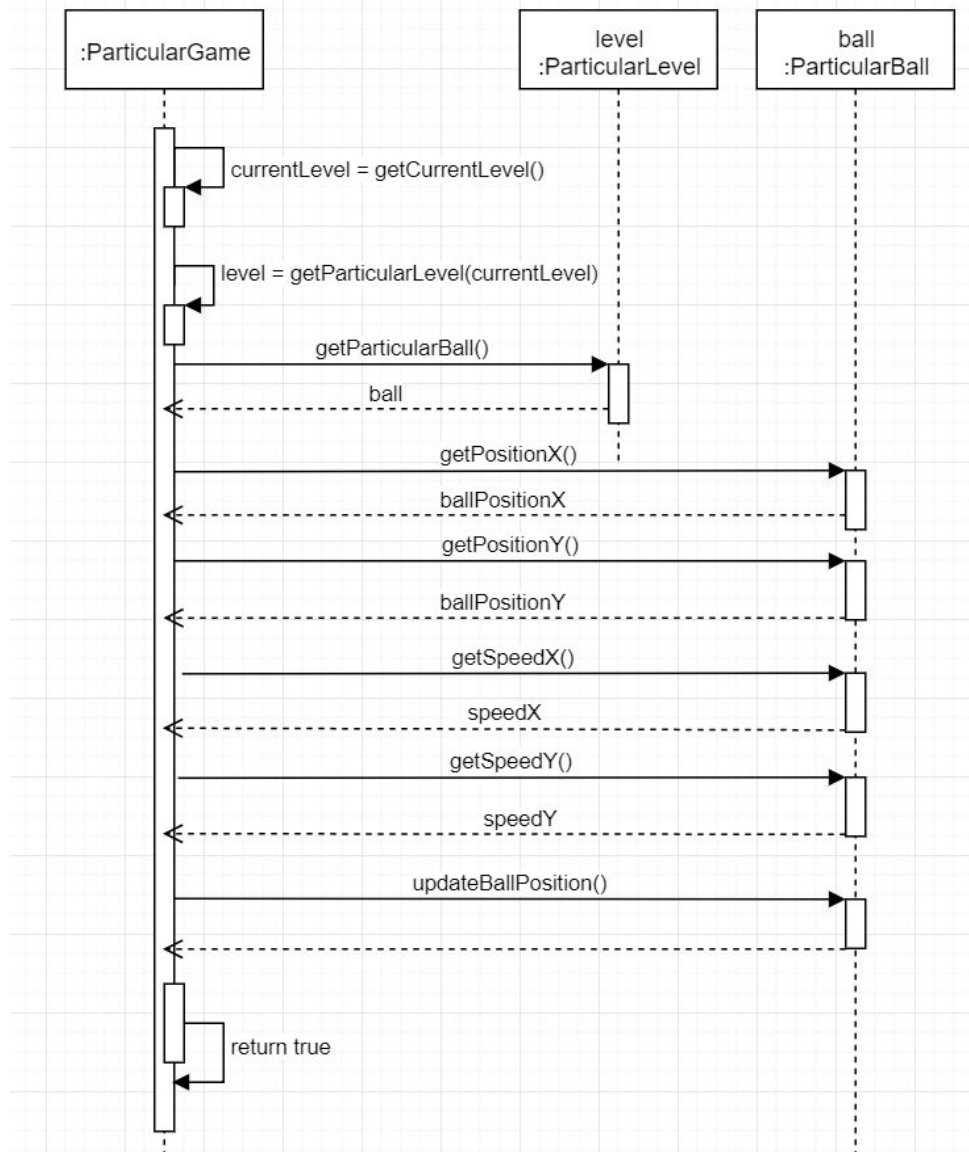

2. **Move ball** (Helene Ma Yang)

- Sequence Diagrams

Private method for guard/action (State Machine)

private boolean ballHittingNothing();

updateBallPosition()

3. **Ball hits paddle/wall** (Haowei Qiu)

- Sequence Diagrams

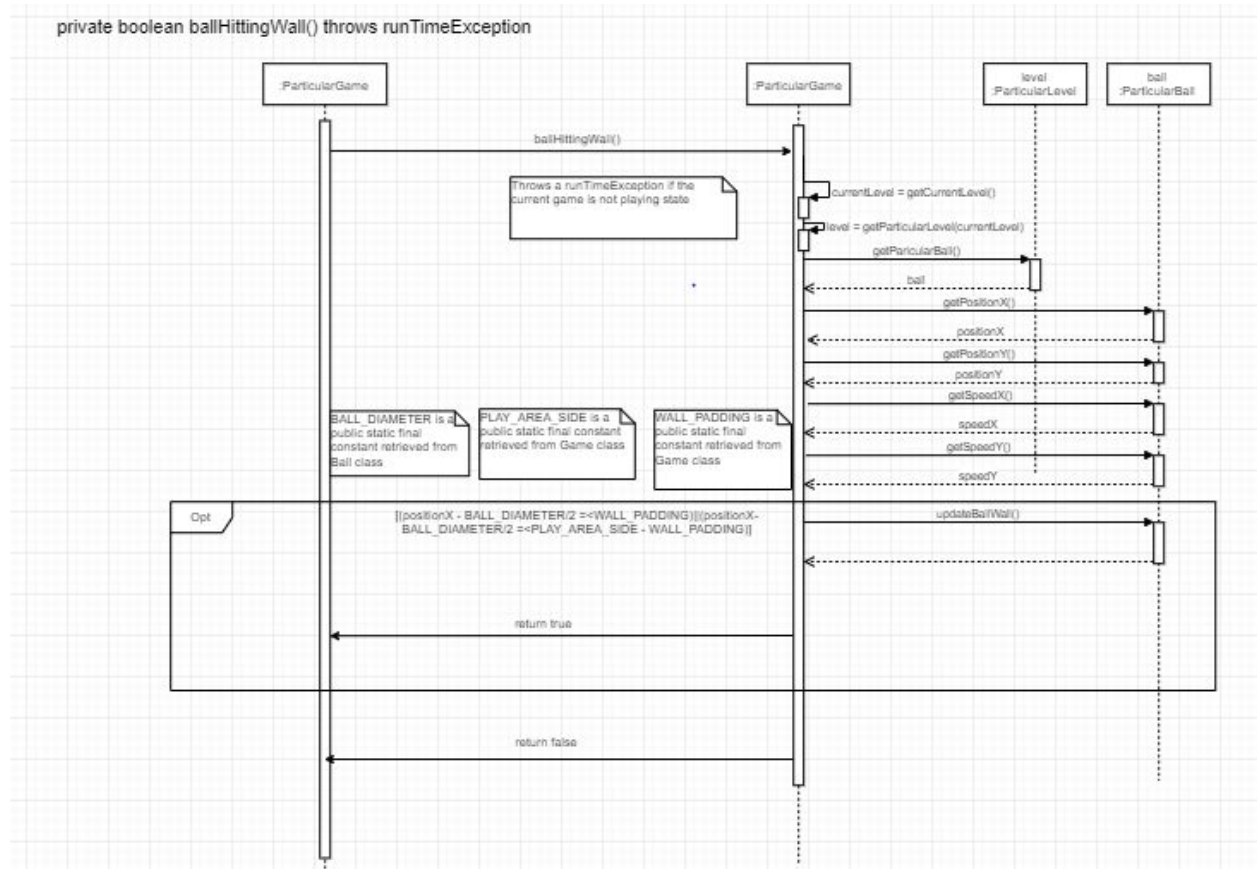

Private method for guard/action (State Machine)

private boolean ballHittingWall() throws runTimeException{

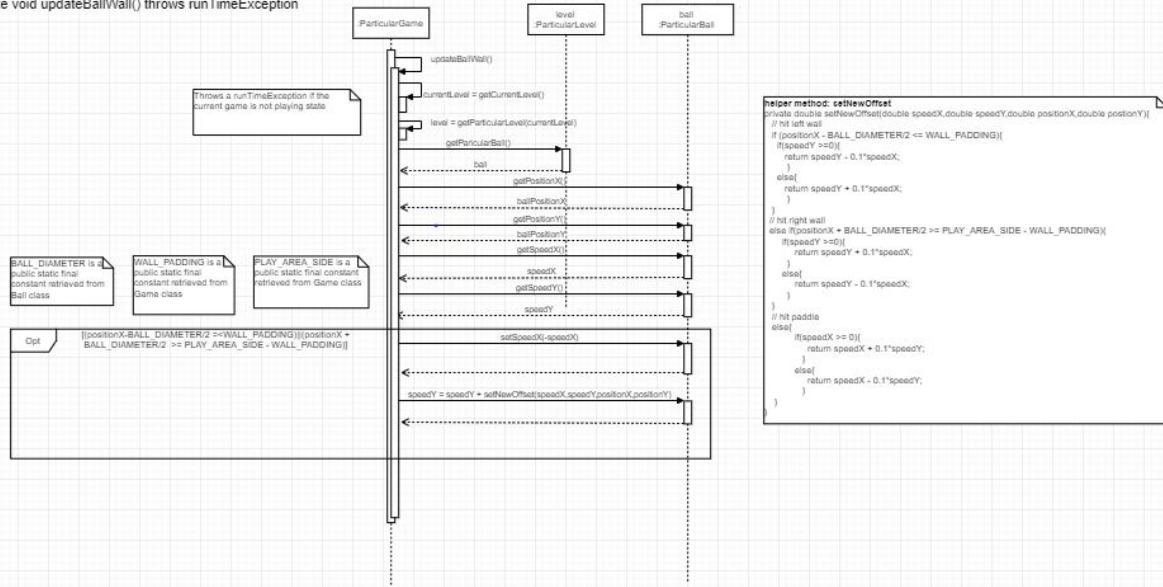

private boolean ballHittingPaddle() throws runTimeException{

private void updateBallWall() throws runTimeException{

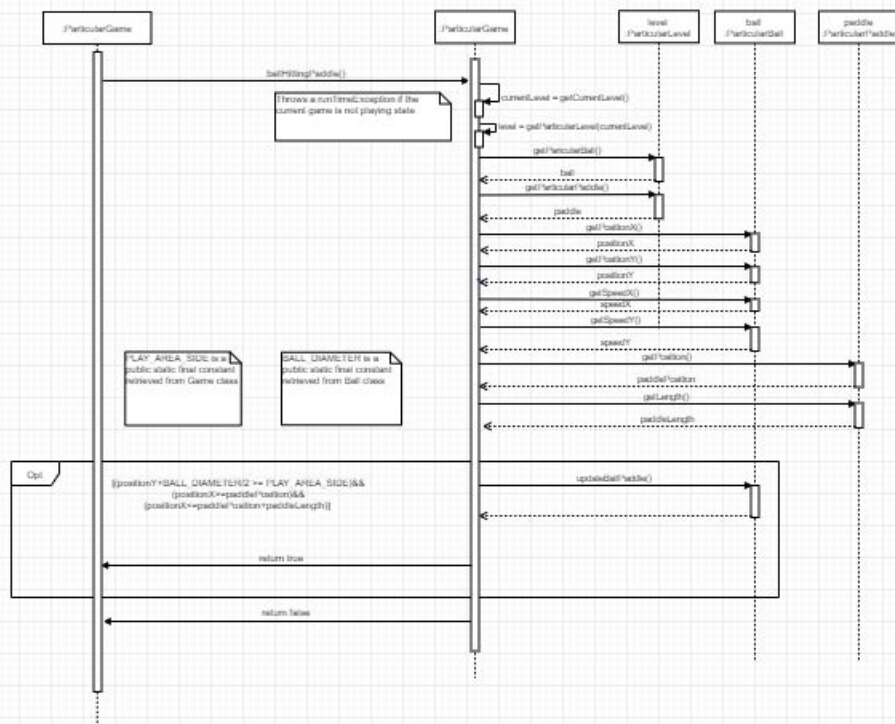

private void updateBallPaddle() throws runTimeException{

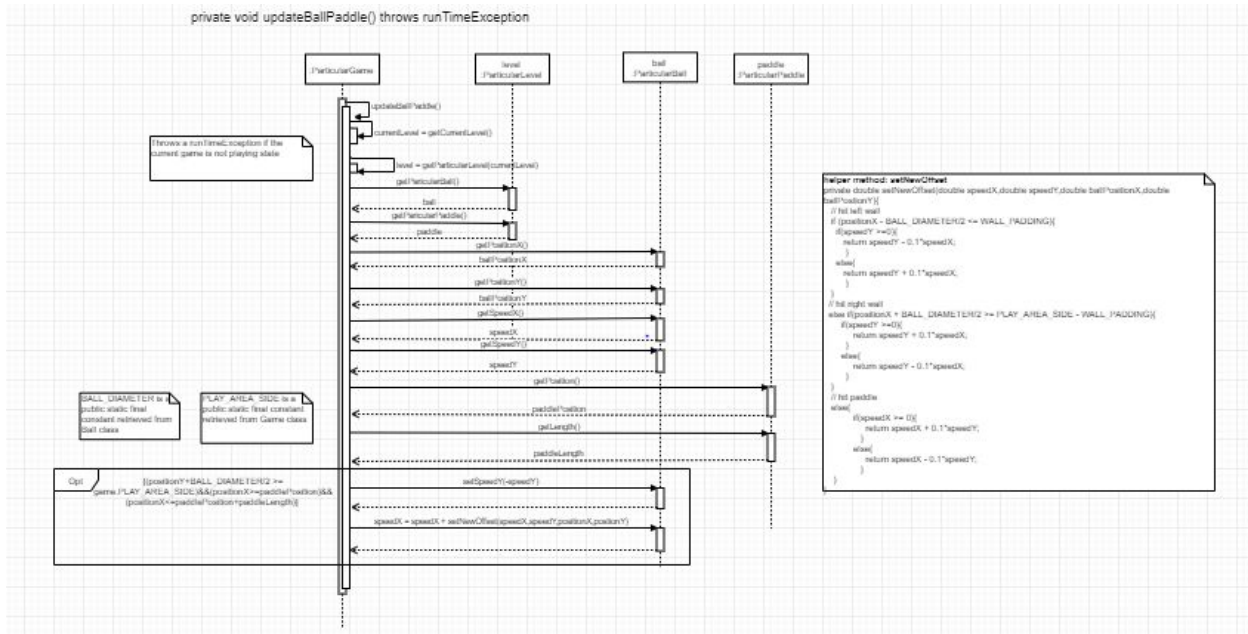

private void updateBallWall() throws RuntimeException

private boolean ballHittingPaddle() throws RuntimeException

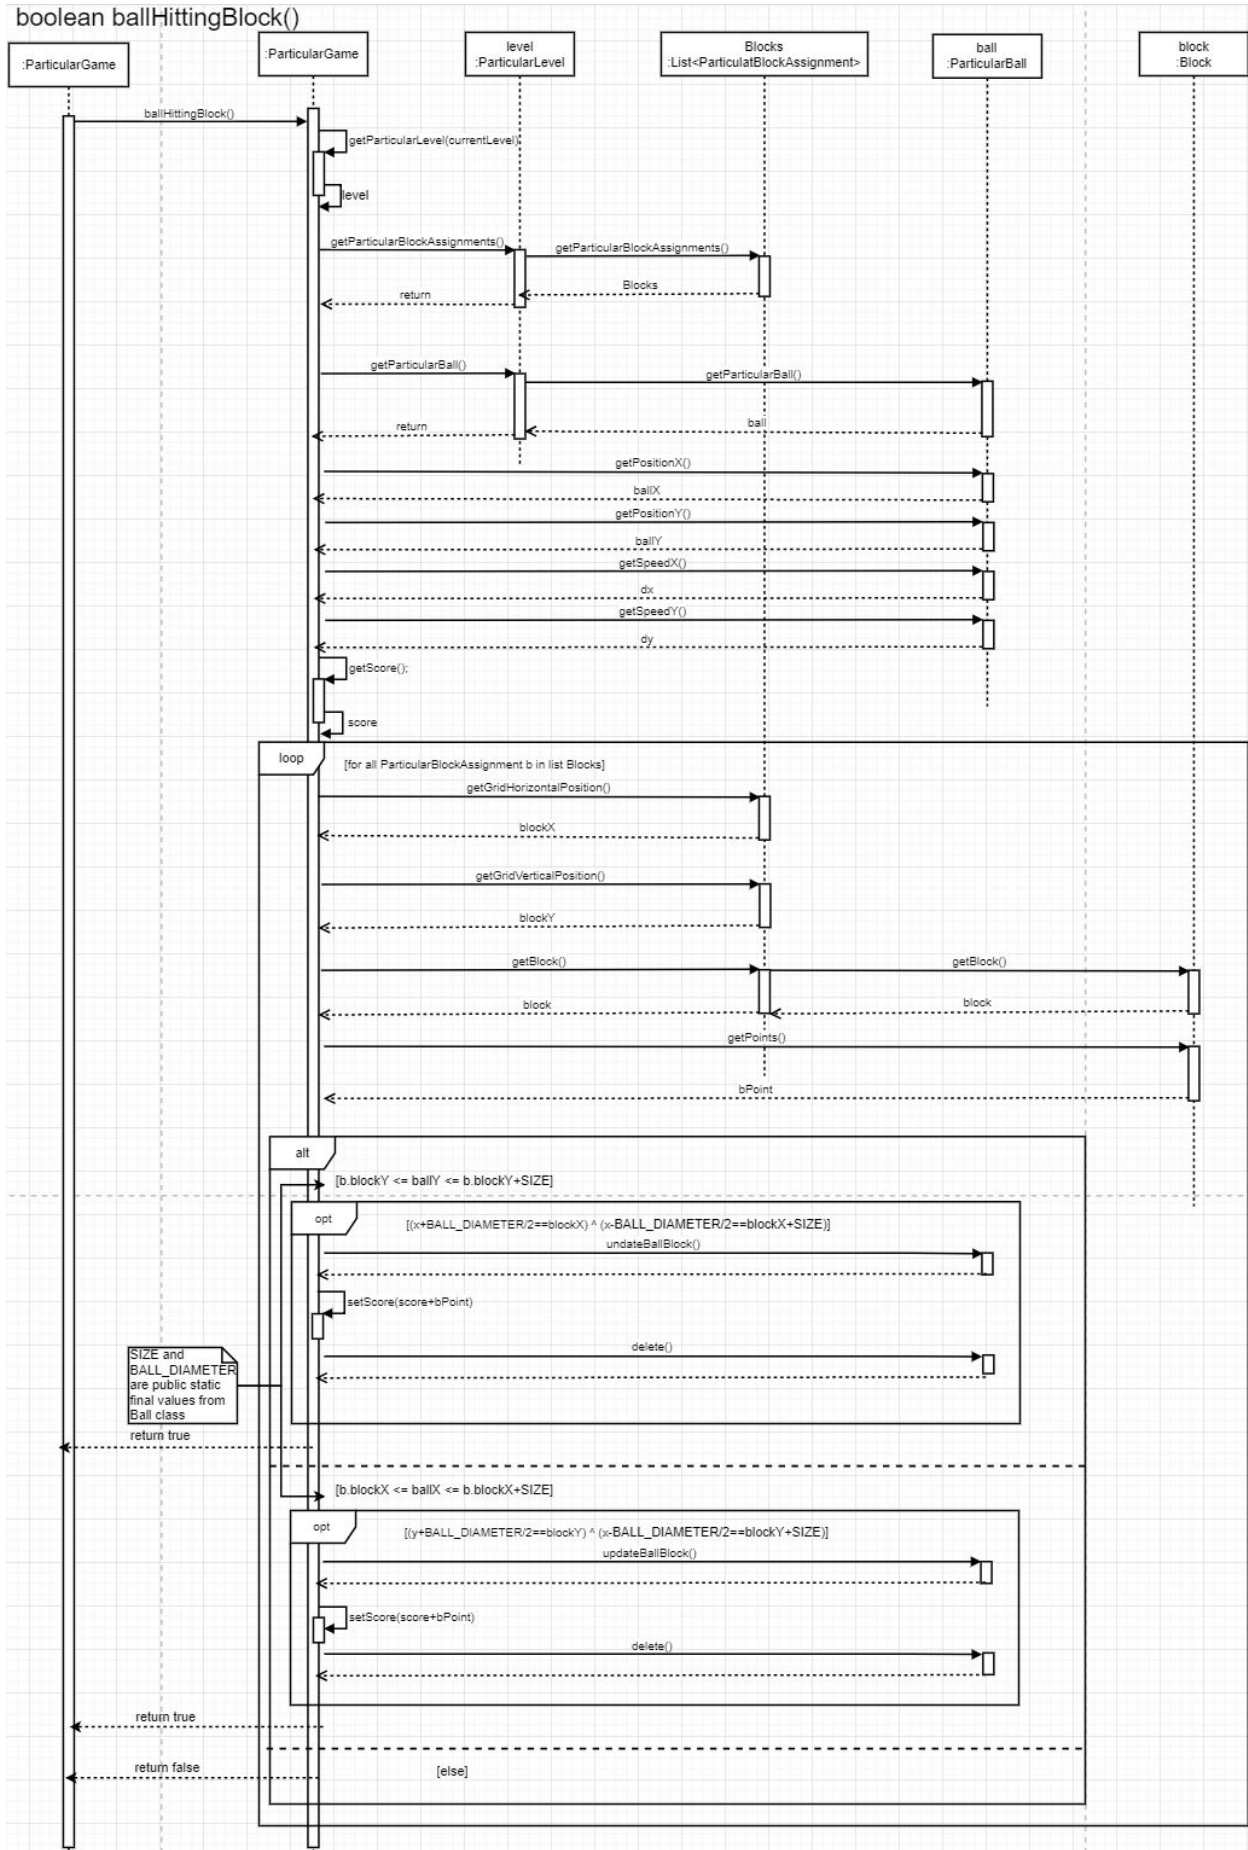

4. **Ball hits block** (Weijing Zhang)

- Sequence Diagrams

Private method for guard/action (State Machine)

boolean ballHittingBlock()

UpdateBallBlock()

5. Ball is out of bounds (Xu Hai)

- Sequence Diagrams

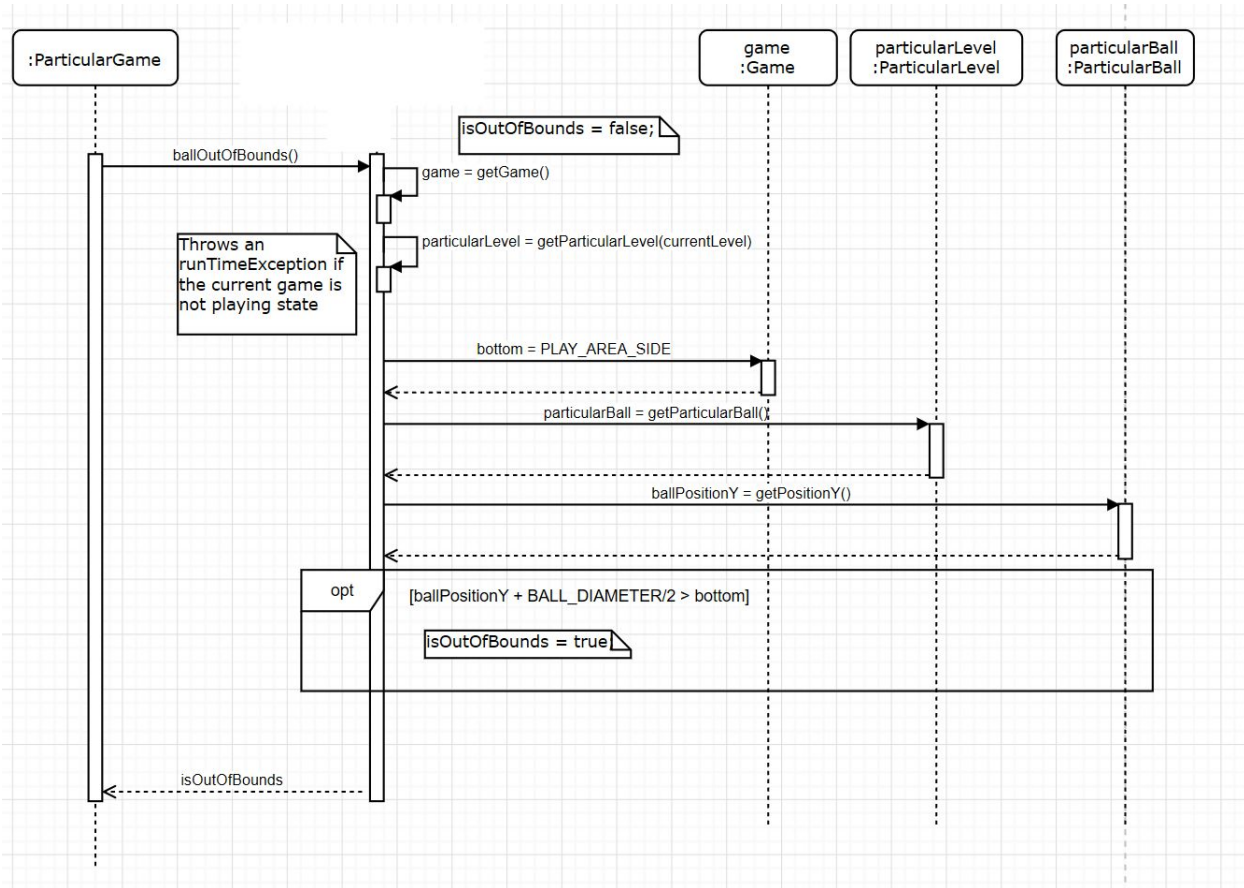

Private method for guard/action (State Machine)

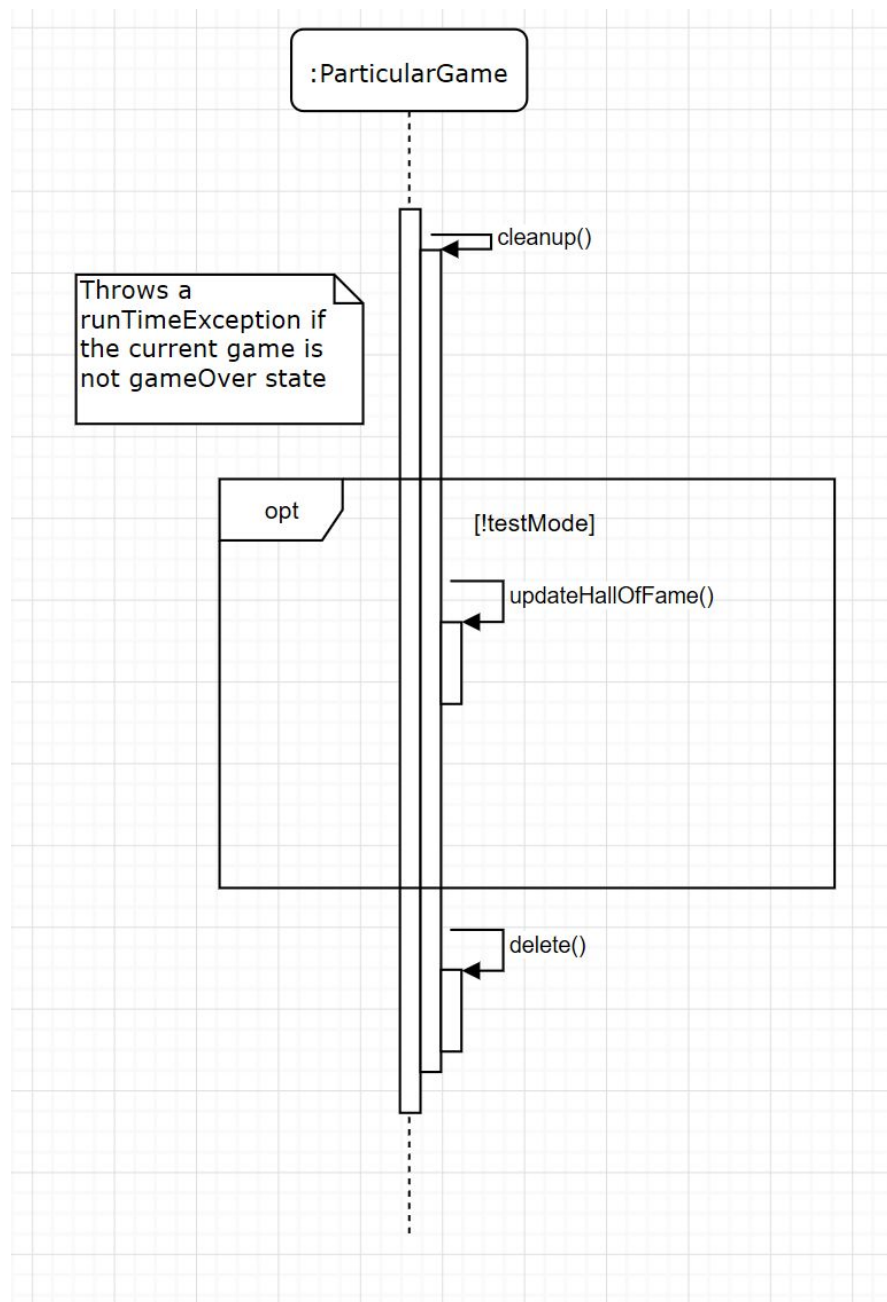

private boolean ballOutOfBounds() throws runTimeException{

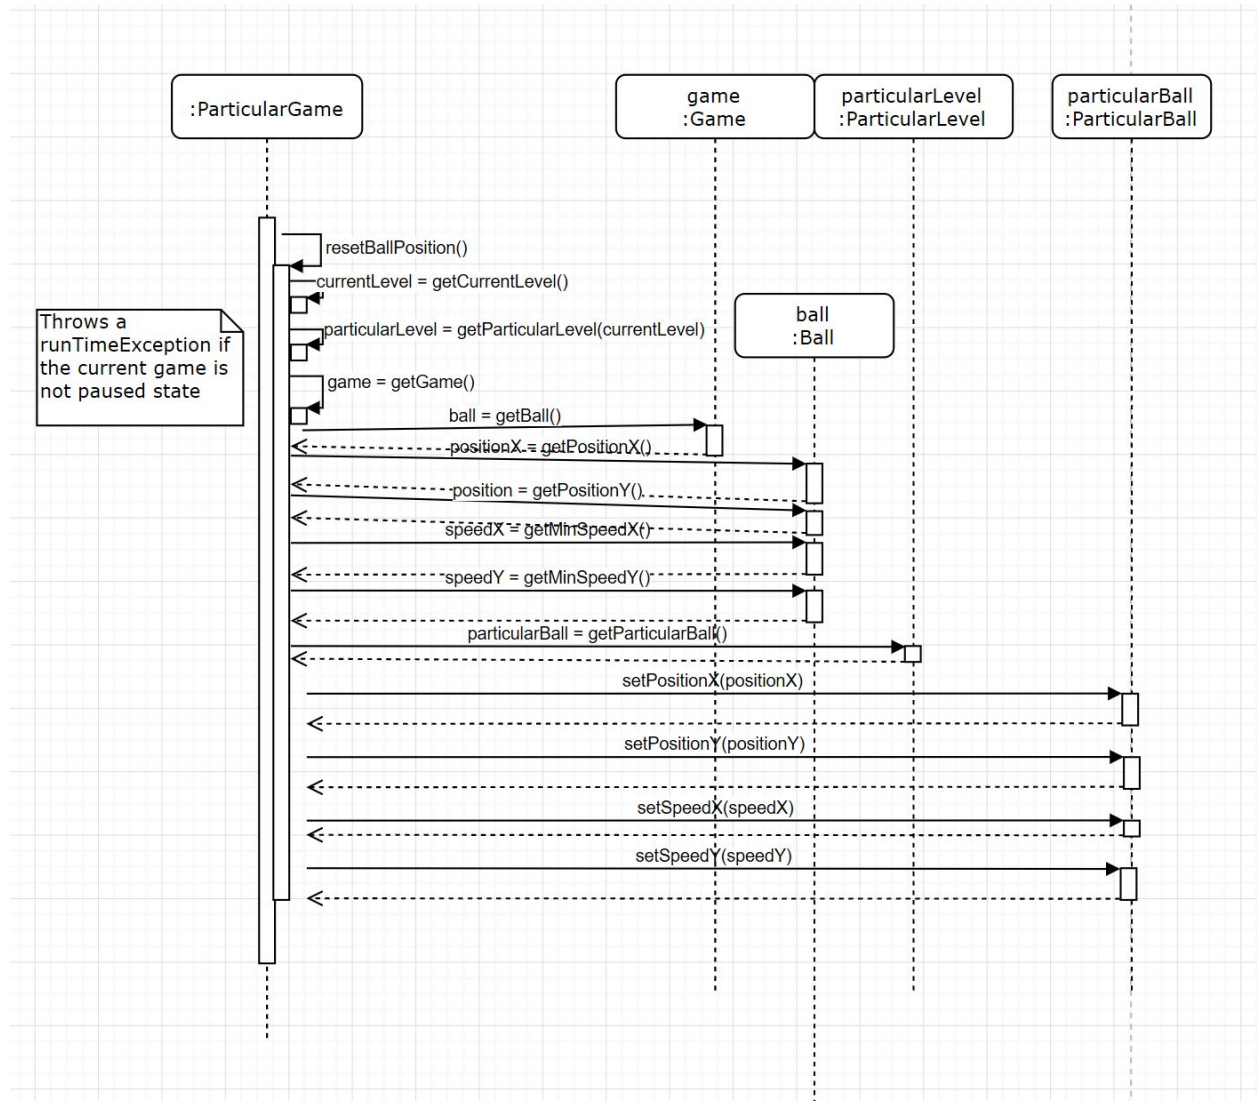

private void cleanUp() throws runTimeException{

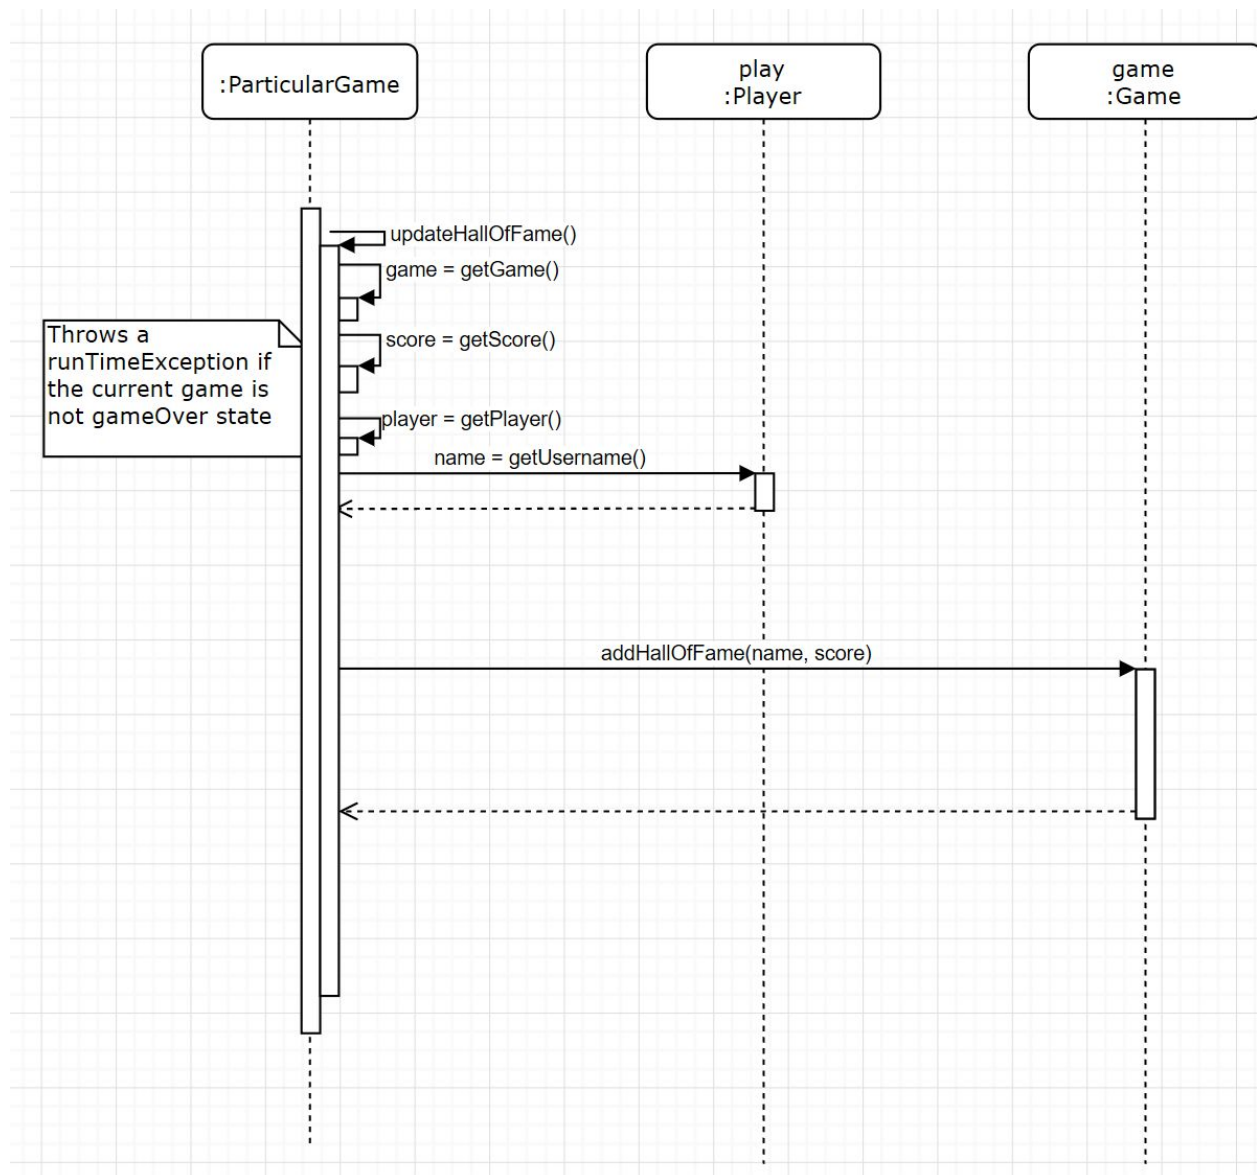

private void resetBall() throws runTimeException{

private void updateHallOfFame() throw runTimeException{};

6. View hall of fame (Zheng Yu Cui)

- Controller Interface (all members)

Modifier methods

`public static void addScore(String user, int score) throw InvalidInputException;`

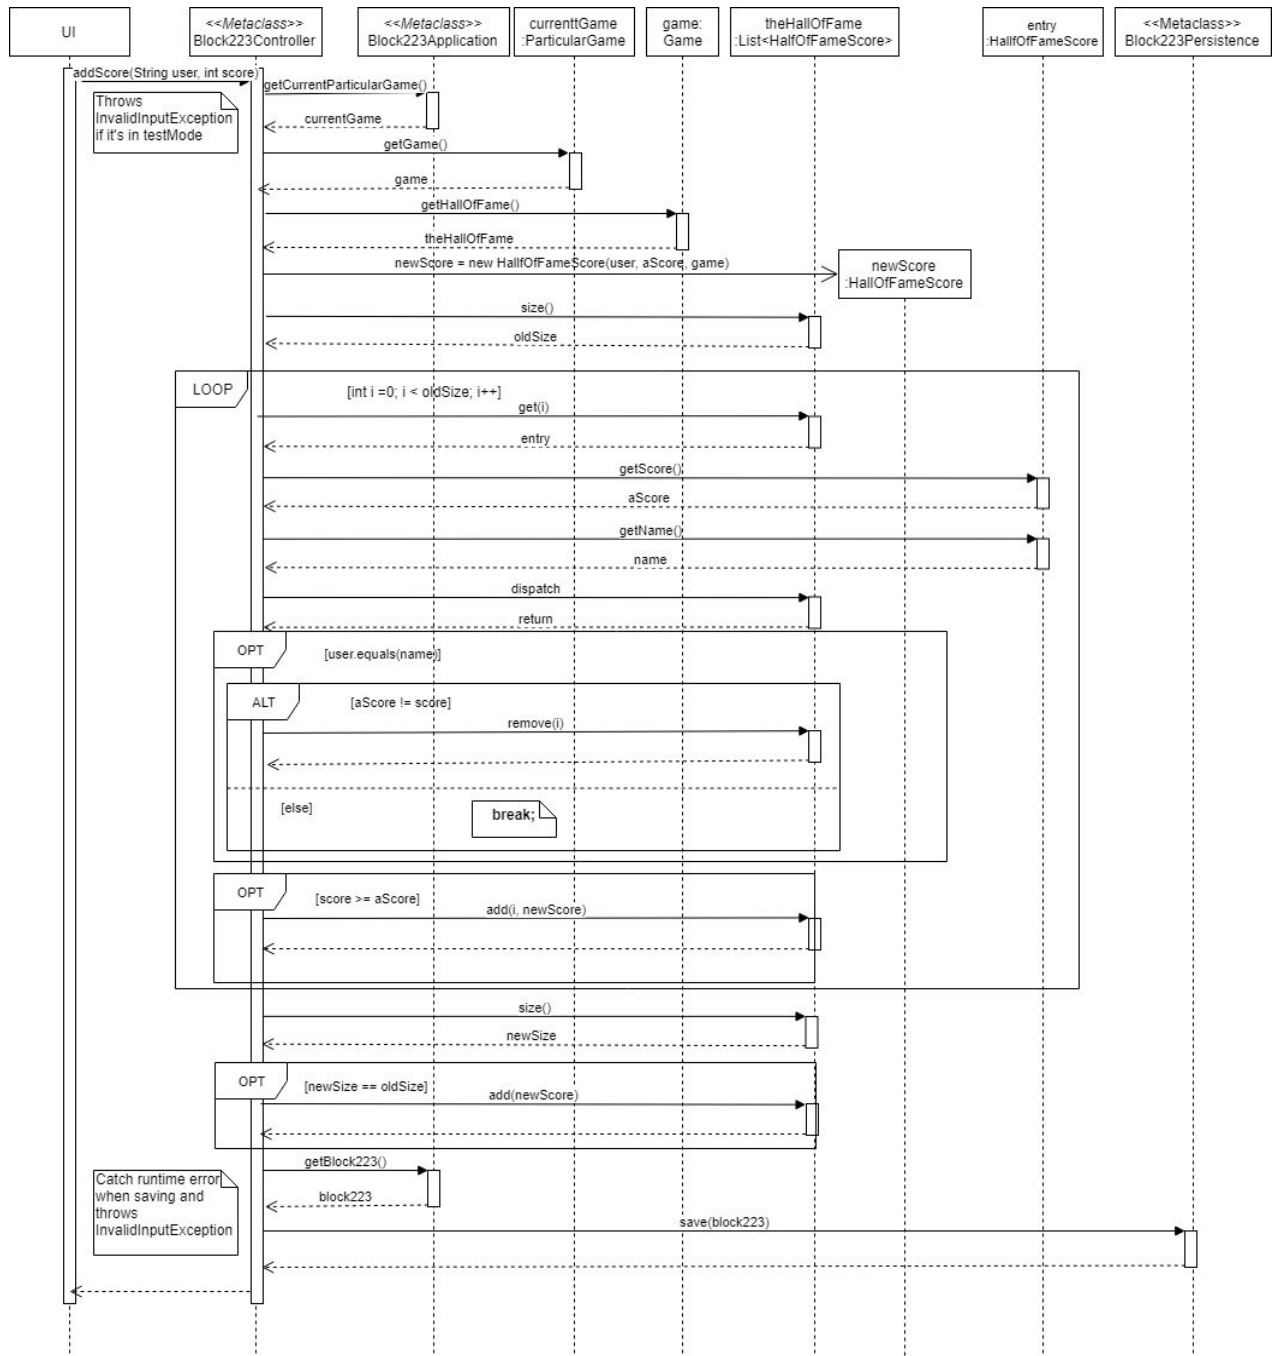

*Query methods *see sequence diagram(s) at the end of the document**

`public static List<TOHallOfFameScore> getHallOfFame();`

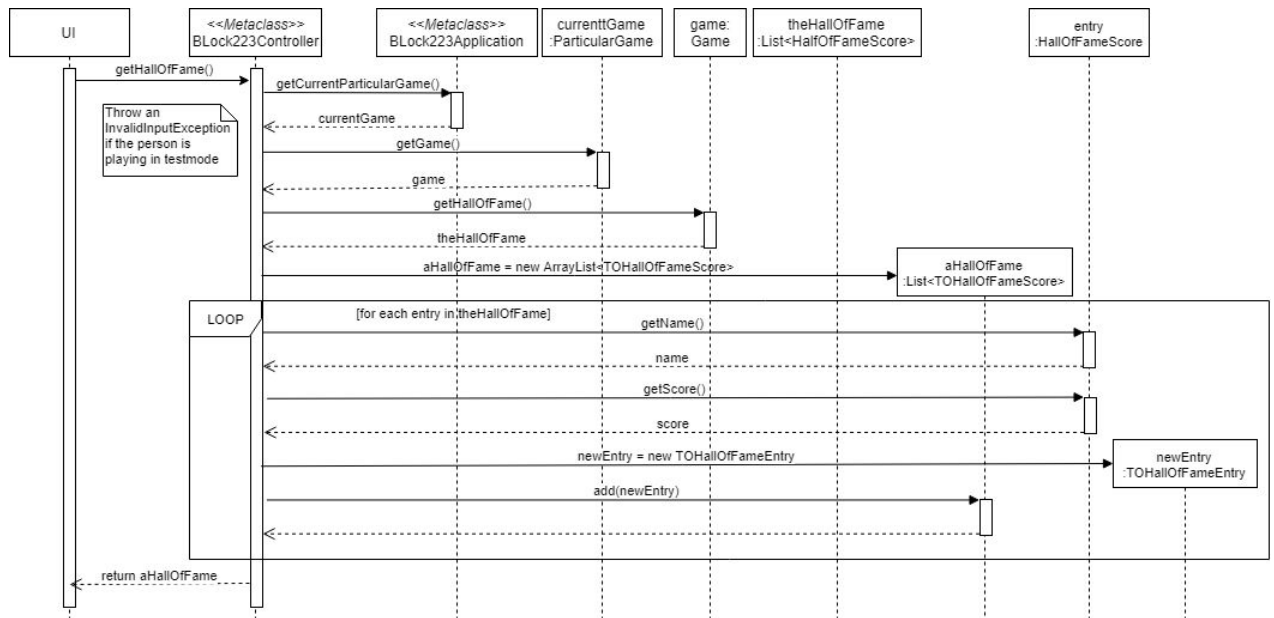

- Sequence Diagrams

Controller:

Modifier methods

Query methods

Private method for guard/action (State Machine)

Not applicable

7. Test game (Helene Ma Yang)

- Controller Interface (all members)

Modifier methods

public static void startTestGame(String gameName) throws InvalidInputException;

Query methods

public static TOParticularGame getCurrentPlayingGame() throws InvalidInputException;

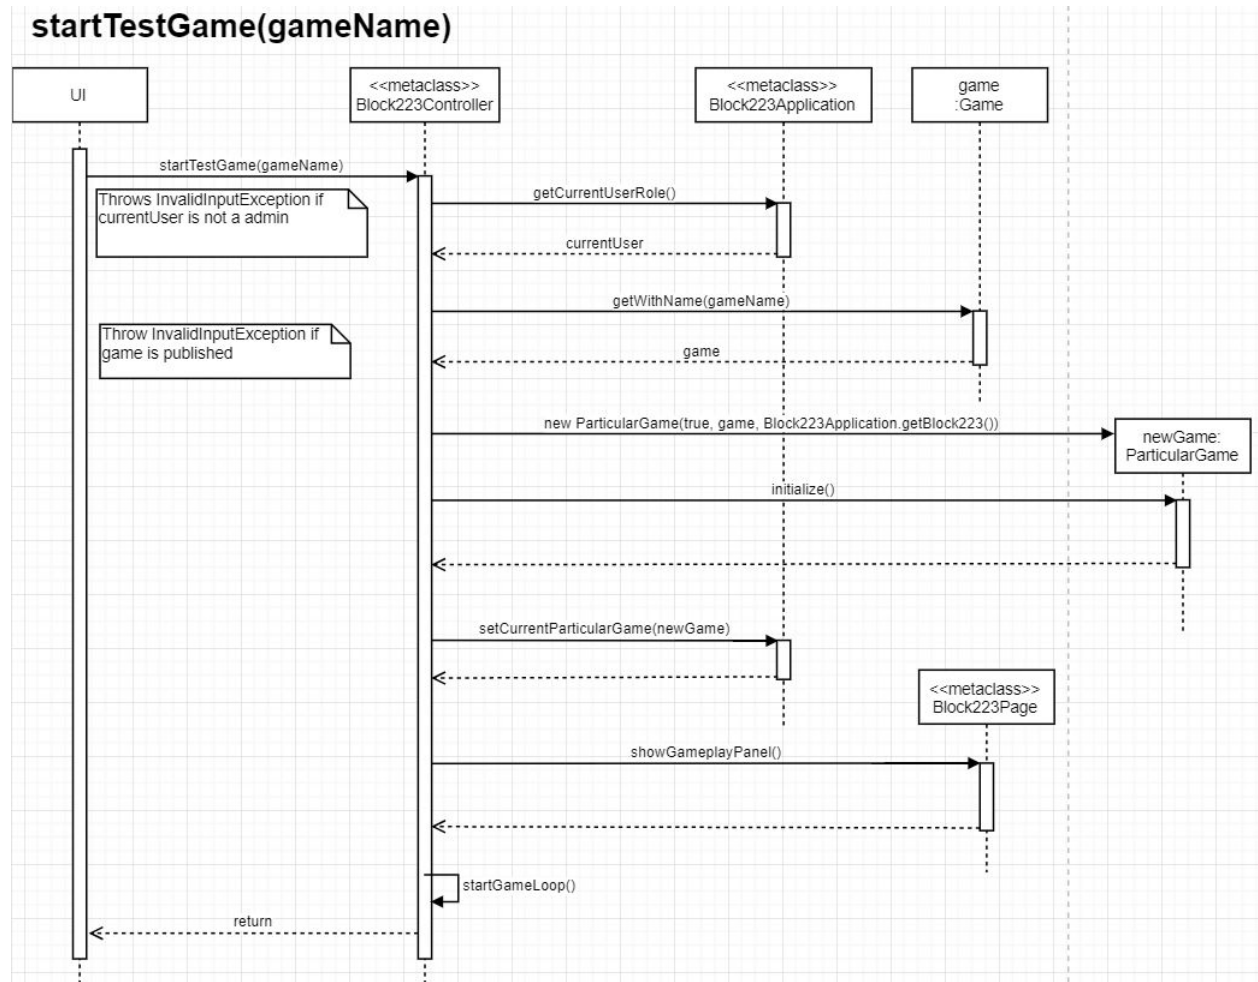

public static TOParticularLevel getCurrentPlayingLevel();

public static List<TOGridCell> getBlocksOfCurrentLevel();

- Sequence Diagrams

Controller:

Modifier methods

Query methods

see sequence diagrams in startGame (feature 1)

Private method for guard/action (State Machine)

Not applicable

8. Publish game (Helene Ma Yang)

- Controller Interface (all members)

Modifier methods (Controller)

public static void publishGame(String gameName) throws InvalidInputException;

Query methods

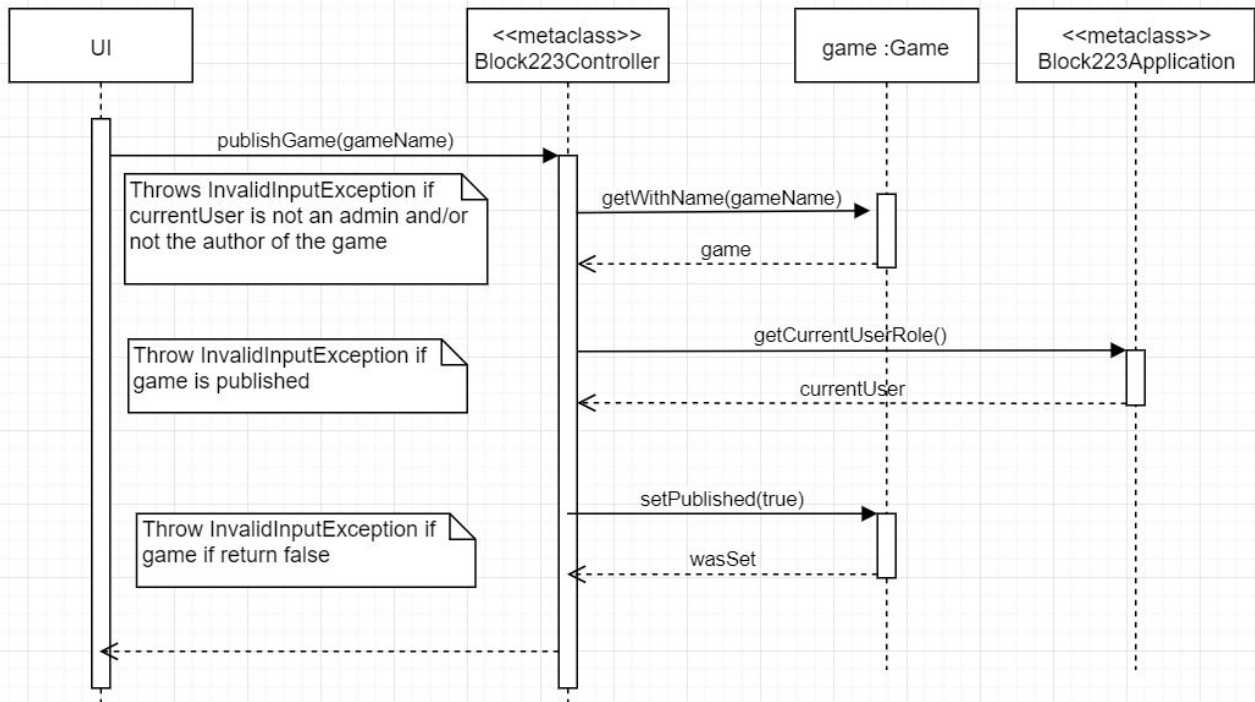

Not applicable

- Sequence Diagrams

Controller:

Modifier methods

publishGame(gameName)

Query methods

Not applicable

Private method for guard/action (State Machine)

Not applicable

9. Move paddle (all members)

- Sequence Diagrams

Private method for guard/action (State Machine)

Additional Validation Checks for Controller Methods from Iteration 2 & 3 (all members)

Controller Method	Condition	Error Message
updateGame	game.isPublished == true	A game cannot be modified after it is published.
setGameDetails	game.isPublished == true	A game's details cannot be modified after it is published.
addLevelToGame	game.isPublished == true	Cannot add a level to a game after it is published.
deleteGame	game.isPublished == true	Cannot delete a game after it is published.
addBlock	game.isPublished == true	Cannot add a block to a game after it is published.
deleteBlock	game.isPublished == true	Cannot delete a block in a game after it is published.
updateBlock	game.isPublished == true	Cannot update a block in a game after it is published.
positionBlock	game.isPublished == true	Cannot position a block in a level of a game that is published.
moveBlock	game.isPublished == true	Cannot move a block in a game after it is published.
removeBlock	game.isPublished == true	Cannot remove a block from a level of a game that is published.
